## Washing & Care Instructions

### For 100% Polyester Fabric

- Machine wash warm (120-160°F), Tumble dry on Medium. Use mild detergent only. Do not wash polyester with any items containing cotton or other fiber contents.
- Do not use caustic soap, bleach, silicone products or fabric softener as it will cause damage to the fabric.
- Attend to soiling immediately.
- Do not place in an extractor.
- Do not overload washer or dryer.
- Check both washers and dryers for rust burrs and foreign objects to prevent snags or pulls.
- Tumble dry for 3 - 5 minutes on synthetic cycle, not to exceed 100 degrees F and remove immediately to avoid wrinkling. As with all polyester fabrics, excessive heat will damage this fabric.
- Dry Cleaning is recommended.
- Dry Cleaning is required for select polyester base cloths and all sheer fabrics. See Base Cloth Specification Sheet for further details.
- AVOID PROLONGED CONTACT WITH HEAT.
- Integra Fabrics suggests that the care instructions you supply your customers clearly state the above instructions as neither Integra nor its suppliers will be responsible for the damages incurred from the use of softeners, other chemicals, or not adhering to the specified care instructions.

## Note:

Some fabrics may have more specific care instructions. Please inquire with your Territory Sales Manager for further information.
